

**THE Nigerian
STOCK EXCHANGE**

MARKET DATA SERVICES

**GAIN REAL-TIME ACCESS
TO AFRICA'S BEST PERFORMING MARKET**

In 2017, NSE was the No. 1 performing exchange in Africa, and 3rd best performing globally

Nigeria - Your Premier Investment Destination

Africa's largest economy is set to remain the region's single largest consumer market, accounting for an estimated 15% of overall growth in consumer spending by 2025 (McKinsey&Co.).

With a stronger global economy, increased FX stability and higher global oil prices, it is expected that Nigeria's economy will grow by 2.5% in 2018 (World Bank)

Government reforms to promote ease of doing business has seen Nigeria move up 24 places in the World Bank's 'Ease of doing business' report

Nigeria's future promises stability, diversification and sustainable returns for investors willing to partner with the country's long term development.

In order to fulfil the increasing demand for fast, reliable data, we provide the necessary technology and data to ensure that business objectives are met. Our aim is to provide a secure, uninterrupted data connection to facilitate effective capital allocation and optimal trading decisions.

REAL TIME FEED

Our Real time data feeds are built on our cutting edge technology for quicker order matching and execution; as a result, our clients can be sure of reliable data when acting on our markets. Built on a scalable platform, with 99.9% availability, the feed is also complemented with added value information such as corporate disclosures and real time indices data.

NON DISPLAY LICENCES

Our Real time feeds are made widely available through our global Market Data Vendors; which enables Financial Institutions to distribute data across a range of internal and external applications. Firms are also able to deliver Real Time Exchange Data to clients through password protected trading portals and client facing platforms. Our goal is to ensure that users are able to provide a superior service based on consistent, reliable and actionable data.

API

The NSE Application Programming Interface (API) has been developed to cater to the growing demand for cost effective data delivery alternative to the Financial Information eXchange (FIX) protocol. Our API Infrastructure is available to a range of developers for the display of Real Time, Delayed or End of Day data on Web-friendly applications.

API

The NSE maintains a high performance trading engine that provides Real Time data essential for anyone trading in the Nigerian Market.

Features

- Availability of up-to-the-minute Stock Quotes
- Easy framing into any website or portal
- Ability to request for individual or multiple data points
- Complete API infrastructural Support
- The API is REST based permitting fast 'time to market' solutions
- Retrieve data in preferred format, JSON or XML

Listed Companies

Our API Infrastructure allows Listed Companies to promote better investor relations and keep up with best practice. Companies listed on the Stock Exchange can display their own stock quotes on their company website on a near Real Time or Delayed Basis.

Application Development

With more avenues opening up for mobile data dissemination, developers can take advantage of the consistent performance of our API infrastructure

Media

Our market reports provide an avenue through which media firms can boost content and keep viewers ahead on stock market news. Connecting to the Exchange is easy with both API and RSS feeds available for integration.

Wallboards

Wallboards are an essential fixture within Lobbies, Dealing Rooms and Financial Centers. The API enables the streaming of Market Information to screens that are customized to each user's requirement.

Reference Data and Historical Data

Historical Data

This service is currently available on a 'per request' basis. End of Day historical quotes may be purchased from the Exchange for a wide range of uses

End Of Day Reports

Our suite of End of day and customized reports provide market statistics that are essential for better research and analysis.

Broker Ranking Services

Our Broker Performance reports are crucial for Fund Managers seeking to invest in the Market.

Corporate Actions

Through our corporate actions notification service, we enable you to stay on top of the market for smarter trading and portfolio valuation.
